

EMC cables

During the eighties, number and sensitivity of electronic devices and systems increased dramatically and little by little the world became aware of "Electro Magnetic Compatibility" (EMC) related problems. Nowadays, almost everybody talks about this problematic and the related European regulatory.

KABELWERK EUPEN was among the pioneers to develop new technologies to meet the industry's and consumer's requirements for non disturbing and electromagnetically immune systems.

Thanks to many decades of experience with cable manufacturing, combined with a thorough knowledge in the field of EMC, KABELWERK EUPEN can offer you clear solutions for some of your EMC problems.
